Senior 4+ years exp. in Software Architecture, Backend (Node.js/.NET), Cloud, and Tech Leadership

EDUCATION

- IDAT Institute** Chiclayo, Perú
• *Information Systems Development (Scholarship)* April 2021 - April 2023
Courses: Data Structures, Analysis of Algorithms, Software Architecture, Artificial Intelligence, Networking, Databases
- ICPNA** Chiclayo, Peru
• *Intensive English Program (Basic - Intermediate)* September 2023 - 2025

SKILLS SUMMARY

- Technologies:** TypeScript, JavaScript, C#, SQL, PHP, Kotlin, NestJS, Node.js, .NET Core, React, Next.js, AWS, GCP, Docker, Redis, PostgreSQL, MongoDB, Clean Architecture, SOLID, DDD
- Soft Skills:** Technical Leadership, Effective Communication, Problem Solving, Adaptability, Stakeholder Management, Agile Methodologies, Teamwork

EXPERIENCE

- Konecta** | Software Engineer Sept 2025 – Present
 - Led the migration from a PHP monolith to **NestJS microservices** using **Clean Architecture, SOLID, and DDD**, reducing response times by 20%.
 - Designed a robust **OAuth2 + PKCE** auth system with **Keycloak** and biometrics, leveraging **Play Integrity** to boost security by 50%.
 - Automated attendance tracking via **GCP Cloud Functions** and Schedulers, integrating with Nextcloud and cutting manual errors by 90%.
 - Built session infrastructure with **Redis** for token caching and biometric validation, optimizing **PostgreSQL** load and user experience.
- Ho-tech - Atik Soluciones** | Backend Developer June 2025 – Aug 2025
 - Integrated **ChatGPT** to automate resume analysis, optimizing talent selection and recruitment workflows.
 - Developed secure **OTP validation** and real-time notifications using **Firebase** and **SendGrid**.
 - Implemented scalable storage for corporate documentation utilizing **DigitalOcean Spaces**.
- Belcorp - Tismart** | Full-stack Developer Jan 2024 – May 2025
 - Led the **FFVV Dollarization** for Bolivia, coordinating multi-currency logic across REST/GraphQL microservices with global teams.
 - Reduced operational overhead by 30% by developing complex **SQL scripts** for high-volume international financial reporting.
 - Optimized real-time inventory synchronization using **AWS SQS**, achieving a 40% reduction in production incidents via **New Relic**.
 - Served as **Interim Tech Lead**, managing code integrations, environment releases across 12 countries, and resolving critical production bugs.
- Gildemeister - Axseniors** | Backend Developer June 2023 – Dec 2023
 - Automated **Salesforce** integrations for vehicle creation, decreasing processing times by 30%.
 - Enhanced operational efficiency by 15% through optimized backend logic for the automotive sector.
 - Ensured data integrity by implementing **database constraints** to prevent duplication in core modules.
- Paskati** | Full-stack Developer July 2022 – Feb 2023
 - Improved stock accuracy by 40% by developing an inventory system integrated with **PDA devices** and chaotic storage algorithms.
 - Integrated **PagoEfectivo** payment solutions, optimizing checkout flows and corporate cash flow management.
 - Reduced search latency by 30% through backend refactoring and efficient delivery under **Agile (Scrum/Kanban)** frameworks.

PROJECTS

- E-commerce CMGarments (Next.js 13, PayPal SDK, Zustand, Sass):** Tech-focused platform with CMS for asset and product management. PayPal integration and Framer Motion animations.
- Bienbonita Inmobiliaria (Next.js 16, Supabase SSR, Tailwind 4):** Land management web with asset administrator and dynamic status filtering. Strict typing with Supabase Typescript CLI.

CERTIFICATIONS

- Next.js: El framework de React para producción (Udemy):** Advanced implementation of SSR, SSG, and API Routes for production-ready React applications.
- Modern JavaScript: ES6 Basics (Coursera):** Mastery of modern JavaScript syntax, asynchronous programming, and ES6+ features for scalable development.
